

6516206626.txt

We as responsible American citizens have a right to hear all the information from both sides that we feel we need to make our decisions about any current issues including the present administration. To have this right taken away is not only unamerican but unconstitutional. This is one of the last free avenues we currently have to get this information free from the huge conglomerates that control the press and the air waves. I feel convinced that to take away any more of our freedoms is a crime against all of us and do not want to believe that this desecration of our rights is possible in this (so called) last free country in the world.
